EDS Project  
Department of Forensics  
Northern Laboratory  
Manassas, VA

Bio-Response had the pleasure of working with DPR Construction to provide the EDS for the new Department of Forensic Sciences Facility in Manassas, Virginia.

The system consists of a 300 gallon collection tank and a 250 gallon process tank. This EDS is a full-featured Bio-Response high temperature unit with internal steam coil and the internal collections basket. We are proud to be a part of one of the most sophisticated forensics facilities in the world.

A few hours later, all components are installed and the machine is ready for all utility connections!

Thanks to everyone we worked with to make this a successful project! We thoroughly enjoyed this experience!
